TRANSFORM INVESTMENTS INTO RESULTS

Capex Strategic Alignment

Ensure Capex Management is aligned with your corporate strategy by establishing clear objectives and comparable investment prioritization criteria, enabling alignment with strategic objectives, transparent decision making, and adherence to financial metrics.

Share Intelligence

Involve technical experts throughout the process to ensure that you have the knowledge you need through every step of the decision-making process. Provide intelligence in building your business case by expanding collaboration with transparency and configurable workflows.

Capital Allocation

Allocate your Capex by individual projects and have greater control over costs and variances throughout the project life cycle. Gain financial insights into the evolution and clarity of impacts on the decision to prioritize or discontinue projects.

Simulation of Results

Ensure a clear financial vision, built on the knowledge of how impacts of different simulated decisions will help decipher the viability of your projects and whether to move them forward.

Structure Project Management

Establish well-defined processes and workflows for project management, from proposition to closure, with complexity-adaptive management methodologies and visibility across the organization. Get all project management support by the integrated solutions that provide unified views of physical and financial progress.

Have Proactive Insight

Get insight into each Capex project execution on a cohesive and interactive dashboard. Track risks, physical and financial developments, resource allocation, and project health so that you can make proactive decisions when needed.

IDEA REGISTRATION

With a simple and intuitive interface, users can register and collaborate in the preparation of innovation project proposals.

TECHNICAL EVALUATION/ECONOMICS

Collaboration of different areas in the assessment and scoring of demands, based on objective criteria and configurable workflow.

teams ideas
BUSINESS CASE

PRIORITIZATION AND SELECTION

Prioritization and selection of demands based on criteria aligned with corporate strategy.

SCENARIO SIMULATION

Scenarios can be simulated, compared and analyzed to increase decision assertiveness.

EXECUTIVE APPROVAL

Systematic approval of proposals by executives or committees.

PROJECTS

USE CAPITAL INVESTMENT MANAGEMENT BEST PRACTICES TO OPTIMIZE ROI

Efficient Capital Investment Management comes from the definition and deployment of strategy in the areas of planning and portfolio management, and permeates the execution of projects with structured, transparent processes, supported by integrated IT solutions, which guarantee efficiency and agility.

Teams Ideas™ is a solution that was developed to ensure the alignment of management processes with Capital Investment Management's best practices.

Teams Ideas™ establishes governance that ensures that only projects with an adequate level of structuring are prioritized in the portfolio, giving the process of selecting and prioritizing investments, transparency, objectivity and standardization.

An efficient process for monitoring and controlling the execution of Capex projects enables the reduction of financial losses.

Teams Ideas™ has a project management module that helps standardize monitoring and control procedures, helping to reduce budget fluctuations through integrated physical and financial tracking and strong governance, included with stakeholder accountability, defined by clear roles and unified follow-up visions.
